Outdoor Special

This summer, interiors celebrate “slow luxury” and the indoor–outdoor fusion through timeless artisanal craftsmanship and enveloping geometric patterns in earthy tones. Spaces embrace ultra-durable, high-performance fabrics that bring the comfort of the living room onto the terrace, all enhanced by soft lighting designed to soothe.

Rediscovered Light: *Fortuny* and the Revival of Its Lighting Treasures

The House of Fortuny carries on the slow luxury tradition by reissuing exceptional lighting pieces created by Mariano Fortuny as early as 1901. Overshadowed by time, these works of art regained their brilliance from 1984 thanks to Lino Lando’s passionate research. Unique craftsmanship: Entirely handmade and decorated in Venice, these lamps stand out for their understated forms and noble materials. Designed to reveal rather than dazzle, they offer soft lighting that enhances any space.

Saum & Viebahn launches **Seaside**, its new indoor and outdoor upholstery collection for summer. It brings together a captivating mix of geometric patterns, stripes and a signature jungle print with Mediterranean charm. Made in Europe, these fabrics combine style and high performance: water-repellent, breathable and with enhanced stain protection. Easy to care for, they are also resistant to light, chlorine and seawater, and flame-retardant—perfect for bringing a holiday feeling home.

Instabilelab presents **Noelia Collection Avenue**

Elegance, geometry and abstract style define a decorative wallpaper featuring intricate labyrinths unfolding in a dance of lines and shapes. Natural tones, from beige to brown, blend harmoniously to create a warm, welcoming atmosphere.
